# hidden_flag.pcap writeup

- **First we open the pcap file and notice the traffic has http requests and it contains some objects like .jpg and .js**

- **We go to file and select export object from http, so we notice there is many files including banner.jpg which looks suspicious**

- **Save the picture and open it, and voila here is our flag**

**Flag: csc_bzu{n0t_v3ry_h1dd3n}**
